

ABOUT ME

I'm a Full Stack Developer, passionate by code, driven to challenges and constantly updating. I really love what I do. Now I'm currently improving Javascript stack (ReactJS, React Native and Node.js) and React Native enthusiast.

JILVAN CÂNDIDO DA SILVA

SOFTWARE ENGINEER

EXPERIENCE

Tech Leader - ICTS - Institute of Technology

since December 2019

Responsible for monitoring activities and delivering the energy efficiency project that makes up a real-time monitoring solution using IoT. Participation in the architecture and definition of technologies used in the project such as Node.js, React.js, React Native, Kafka, MongoDB, Elasticsearch, Redis, and Docker. Development DevOps activities using Google Cloud Platform.

Full Stack Developer - FIT - Institute of Technology

since March 2018 - November 2019

I worked to develop and maintain microservices that collect data from other areas such as production factory, stock and financial to process and group the information to show on a dashboard for management decisions. To containers I used docker, to build microservices I used Node.js and Spring Boot (JAVA) on the back-end and React.js and React Ntive on the front-end. We used Scrum to planning the activities of the projects, JIRA to management project and management issues, and BitBucket (Git) to version control.

Full Stack Developer - SENAI - AM

since December 2014 - February 2018

I worked such as a front-end developer to develop the main home page of the company. I made some queries on SQL Server to extract data to use on reports by Crystal Reports. I used Scrum for planning the activities of internal projects and Trello to manage projects.

Full Stack Developer - Rádio TV do Amazonas

August 2007 - November 2014

I worked on the migration and maintenance of desktops applications such as financial and commercial to the web application, I used ASP.NET C#. I optimized stored procedures and queries on SQL Server, MySQL, and PostgreSQL. I used Scrum to planning the activities and SVN to version control.

EDUCATION

Node.js, Express, React, React Native, MongoDB and Docker.

Abril 2019

Rocketseat

Fullstack Angular and Spring Boot 2

June 2018

AlgaWorks

Bachelor of Science in Computer Science

March 2000 - December 2004

UNIP - Brazil
